PROFILE

An adept web developer specializing in the MongoDB, ExpressJS, ReactJS and NodeJS stack. Proficient in building full-stack applications; is efficient in working with either the frontend or the backend. Highly adaptive; can learn new technologies that are best suited for certain tasks. Efficient; can deliver quality products within a given period. Always eager to learn and do research, understands the invaluable significance of knowledge, and utilizes all available resources to be able to overcome struggles.

Experience

Alpha Development (Freelance)

Web Developer (2019 - Present)

Worked with a number of clients in the past year on fully custom-made websites with different purposes such as: an online library for a school, a portfolio for an artist, a web-based school system and a business landing site.

FEATURED PROJECTS

Artist's Portfolio

<http://www.cocabo.co>

<https://github.com/cyrilcabo/darkportfolio>

A web portfolio for an artist to showcase his works. Built with NextJS, ReactJS, ReduxJS, Material-UI, ExpressJS, HTML5, and CSS3.

- Used Google Firebase for storage and database.
- Built a blog platform, where visitors can comment and like blogs from the artist.
- Built a gallery section, where visitors can view works, and with a built-in mailing service to easily contact the artist.

Hotel Booking Site

<https://bookmate.herokuapp.com>

<https://github.com/cyrilcabo/bookmate>

A fully-featured hotel booking web application. Built with NextJS, ReactJS, ReduxJS, Material-UI, ExpressJS, MongoDB, HTML5, and CSS3.

- Has Stripe integration to process card payments.
- Built with a user authentication system.
- Users can view previous bookings made.
- Built with a gallery to view property amenities.

EDUCATION

B.S. in Computer Science

University of the Philippines
