## PROFILE

An adept web developer specializing in the MongoDB, ExpressJS, ReactJS and NodeJS stack. Proficient in building full-stack applications; is efficient in working with either the frontend or the backend. Highly adaptive; can learn new technologies that are best suited for certain tasks. Efficient; can deliver quality products within a given period. Always eager to learn and do research, understands the invaluable significance of knowledge, and utilizes all available resources to be able to overcome struggles.

## FEATURED PROJECTS

### Bookmate

<https://bookmate.herokuapp.com>

Bookmate is a web-based booking application, complete with user registration, user authentication, bookings history and card payment system. It is also mobile friendly. It is built with ExpressJS, Material-UI, MongoDB, NextJS, ReactJS, and ReduxJS.

### Alpha Development

<https://www.alphadevop.co>

Alpha Development is a portfolio site made to showcase Cyril Cabo's skills and expertise in web development. It is currently built with ExpressJS, ReactJS, ApolloClient, GraphQL, MongoDB, TypeScript, and Material-UI. It is deployed in docker containers, and is configured with Nginx, that is secured with LetsEncrypt free SSL certificate.

## EDUCATION

### B.S. in Computer Science

University of the Philippines - 2023

## WORK EXPERIENCE

### Freelance Research Writer

(2018-2019)

A year-worth of experience in both data-analysis and research-writing. In that span, work included conducting researches, analyzing and interpretation of data for clients, writing research methods and instruments, and conducting analysis of both qualitative and quantitative data.

### Freelance Web Developer

(2020-PRESENT)

Developed personal projects, and made web applications for close friends and family.
